

B.I. Voyage Launches Industry's First PowerPivot Solution Portfolio, Introducing PowerPivot Fast Track

Empowers organizations considering Microsoft's latest in-memory analytical toolset with best practices based deployments & training for Microsoft PowerPivot using rapid engagement methodologies

Hamilton, IN ([PRWEB](#)) July 8, 2010 -- B.I. Voyage, a premier provider of Microsoft-based business intelligence and data warehousing services, introduced today a new portfolio of solutions specifically designed for the enterprise adoption of Microsoft PowerPivot, branded as PowerPivot Fast TrackSM. An innovative technology in the large Business Intelligence market and one of the most popular new technologies released with Microsoft SQL Server® 2008 R2, PowerPivot empowers business users to create managed self-service BI solutions without relying on IT resources. To capitalize on PowerPivot's abilities organizations need the capability to preview and deploy the technology with IT governed best-practices coupled with premier training.

To that end, B.I. Voyage now introduces PowerPivot Fast Track, delivering affordable and optimized Microsoft PowerPivot organizational previews, deployments, and training. Uniquely designed for PowerPivot, the solutions portfolio provides a simplified and best-practices series of engagements for real-world Microsoft PowerPivot deployments leveraging rapid methodologies. Going forward the solutions portfolio will expand to accommodate future innovations in PowerPivot deployment best-practices and training. Now available to organizations of all sizes, more information on PowerPivot Fast Track can be found on the B.I. Voyage website. "Microsoft PowerPivot represents a significant opportunity for customers to obtain maximum business insight from their existing data repositories" said Derek Comingore, Principal Architect of B.I. Voyage. "We are proud of our company's early accomplishments for Microsoft Business Intelligence customers including the creation of our newly released series of PowerPivot specific engagements."
